

Now you can improve filter performance in POE and POU systems.

Only patented KDF[®] Process Media deliver all of these benefits:

- Remove chlorine, iron, hydrogen sulfide and heavy metals from water
- Control scale, bacteria and algae
- Extend the life and improve the performance of GAC, RO and IX filtration systems
- Eliminate the need for expensive silver impregnated carbon and pesticide registration hassles
- Reduced material requirements result in more compact and more economical water treatment systems
- KDF Process Media contain no chemicals and are 100% recyclable
